

# Deep Dive with Amazon ECS

## Clusters

### Create a cluster

```
aws ecs create-cluster --cluster-name deepdive
```

### List all clusters

```
aws ecs list-clusters
```

### A deeper look into the cluster's state

```
aws ecs describe-clusters --clusters deepdive
```

### **(Optionally)** Delete the cluster

```
aws ecs delete-cluster --cluster deepdive
```

- Do not delete it now unless you're experimenting on your own
