Container Agent configuration documentation

<http://docs.aws.amazon.com/AmazonECS/latest/developerguide/ecs-agent-config.html>

Create the S3 bucket for the deepdive cluster

```
aws s3api create-bucket --bucket nickjj_deepdive
```

- Replace `nickjj` with your AWS organization name

Review the ecs.config file

Follow along with the video

Copy the ECS config file you downloaded to the S3 bucket

Make sure you're in the deepdive/ folder when executing this command

```
aws s3 cp ecs.config s3://nickjj_deepdive/ecs.config
```

- Replace my `bucket name` with yours

Verify the ECS config is in the S3 bucket

```
aws s3 ls s3://nickjj_deepdive
```

- Replace my `bucket name` with yours

Edit the copy-ecs-config-to-s3 bash script with your S3 bucket name
